

1. *Analysis Topic*: **1-a** Distribution of education levels of respondents who reported to use internet
- Education (field: educ2)

Table 1. Distribution of education level of respondents who reported internet users

Education_Level	#Respondents	Distribution%
LessThanHighSchool	34	1.9%
HighSchoolIncomplete	75	4.3%
HighSchoolGrad	378	21.5%
SomeCollege	285	16.2%
TwoYrAssociate	197	11.2%
FourYrCollege	465	26.4%
SomePostGrad	183	10.4%
Posgrad	143	8.1%
Total	1760*	100%

*1760 is the total respondents who reported to use internet (regardless what internet tools they were using). The number also excludes missing data (e.g., data value is blank)

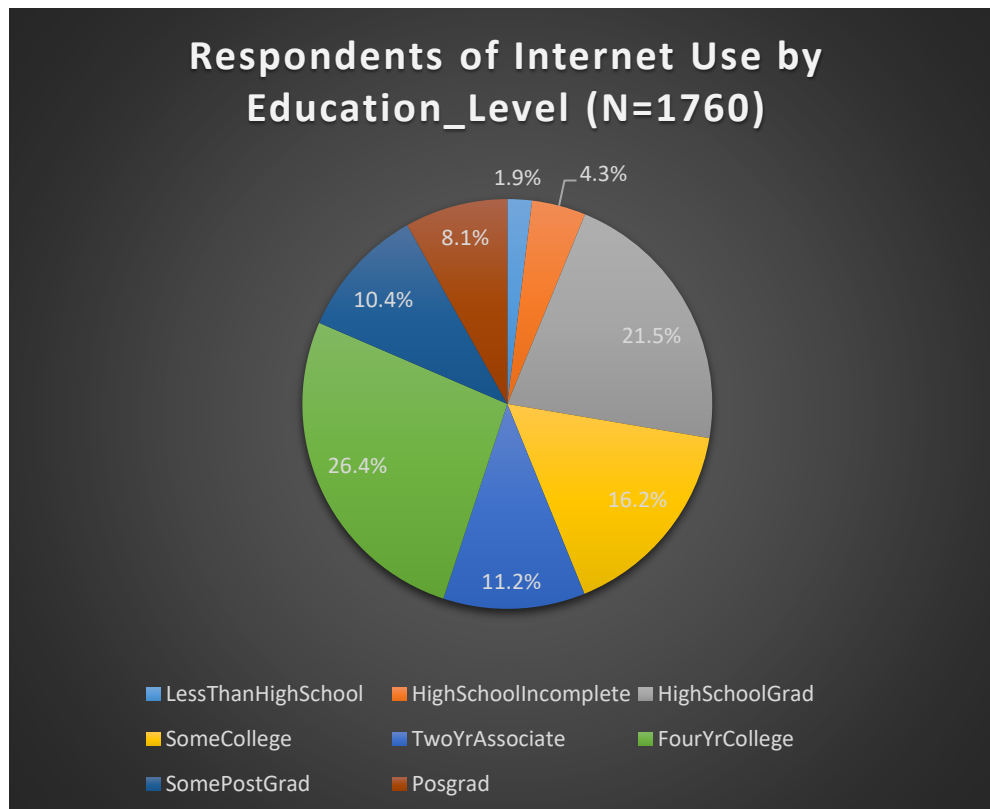

Figure 1. Distribution of Education Levels of Reported Internet Users

1-b. How often do you use the internet (field: intfreq) by education level

Table 2. Frequency of Reported Internet Use by Educational Level

	AlmostConstantly	SevealTimePerDay	AboutOncePerDay	SeveralTimesPerWeek	LessOften
LessThanHighSchool	9	13	3	7	2
HighSchoolIncomplete	10	36	7	9	13
HighSchoolGrad	92	160	45	41	38
SomeCollege	82	126	34	19	22
TwoYrAssociate	51	98	22	10	16
FourYrCollege	148	258	26	23	10
SomePostGrad	54	105	15	6	3
Posgrad	47	79	10	4	3

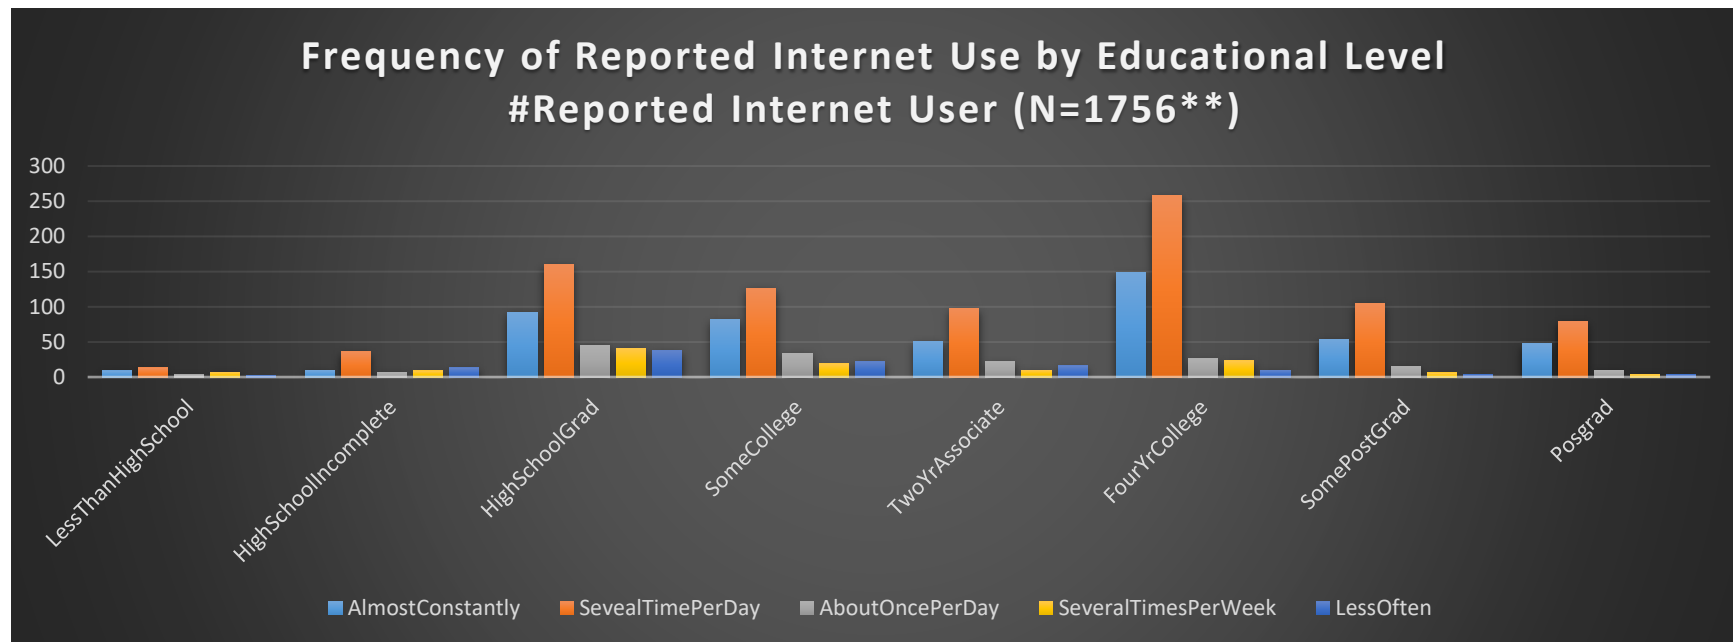

Figure 2. Frequency of Reported Internet Use by Educational Level

**The total number for this question is N=1756 because 4 out of 1760 internet user respondents either reported “Don’t know” or “Refused” to respond to the question related to their education level.

2. *Hypothesis*: - Tentative Hypothesis: Do younger people (need to define 'younger') use the internet more frequently than older people? And does this internet usage vary by education?

I grouped ages into four age group: 18-34, 35-52, 53-65, and 66-97 based on the interquartile range information provided by Evelyn. ***The total number of usable data for Table 3 is N=1740. 20 out of 1760 reported internet users did not disclose their age information.

Table 3. Age group distribution of reported internet users

Age_Group	#Respondents	Distribution%
18-34	485	28%
35-52	477	27%
53-65	421	24%
66-97	357	21%
Total	1740***	100%

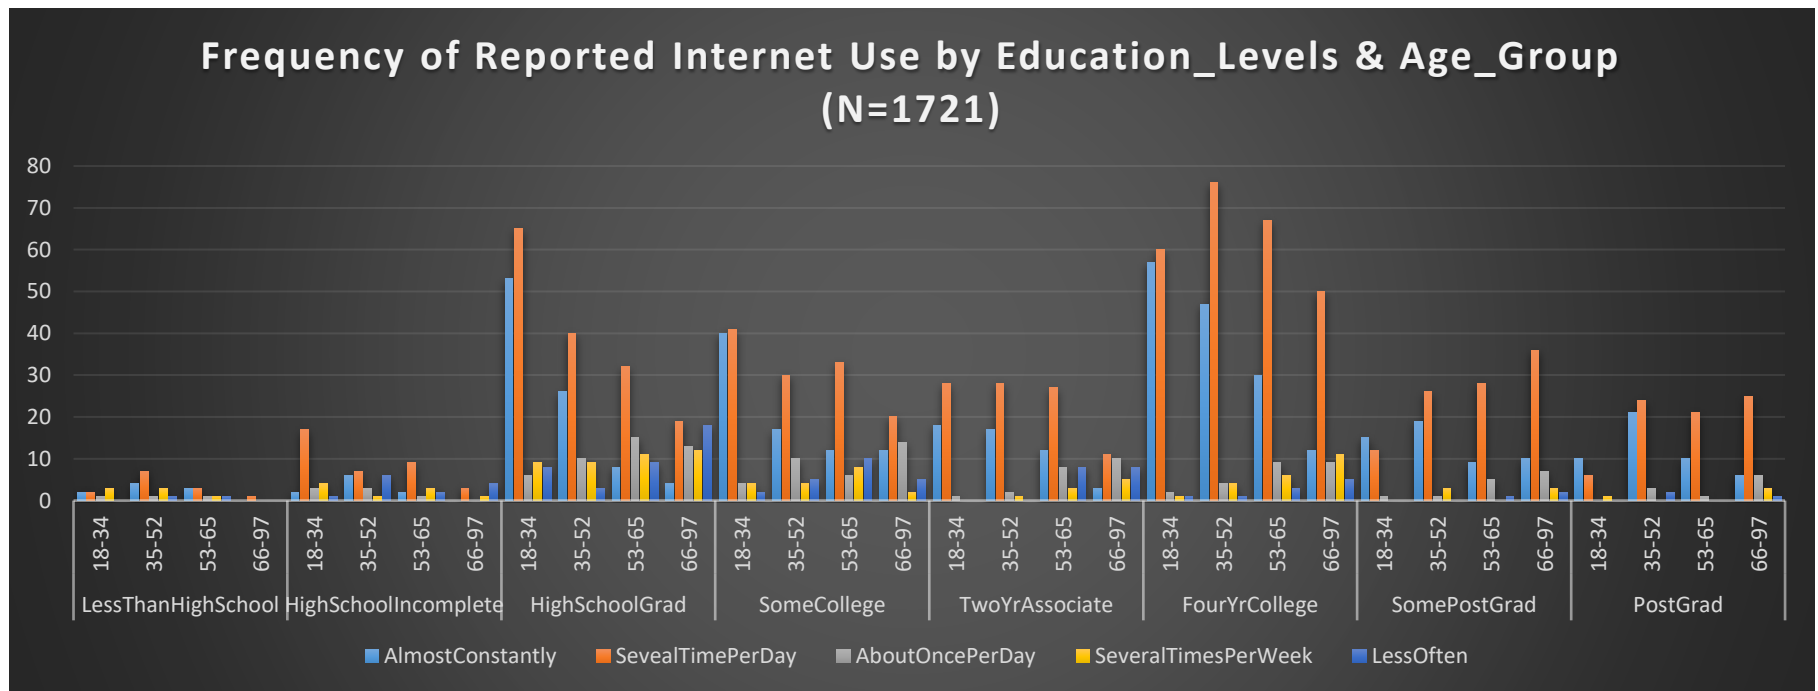

Figure 3. Frequency of Reported Internet Use by Age_Group and Education_Level (N=1721 is by taking out 19 from 1740 in Table 3. The 19 respondents did not disclose their education level information).
